Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16-17, 20-23 and 29, drawn to subcombination, classified in class 248, subclass 176.1.
- II. Claims 18-19, drawn to combination, classified in class 446, subclass 236.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it can be found as sign stand support with legs and braces therebetween to stabilize the legs. The subcombination has separate utility such as rotatable toy stand for baby on the floor.
